Build Your Own Robot!

Join the Cobot Maker Space from the University of Nottingham to build your own robot. We will be running workshops for **children aged 7 upwards on Wednesday 15th February at Mansfield Museum**. During these sessions children will be given the opportunity to explore their creativity, use their team-working skills, and learn how robots can interact with humans to help with everyday tasks, while working in a team to build a robot out of LEGO. There will also be an opportunity to meet and interact with some of the robots from the maker space like Miro below.

Sessions will run **10am to 12pm, and 1pm to 3pm**. To find out more and book your place please visit <https://t.ly/4mB3> or search for the workshop on the Nottingham Festival of Science and Curiosity website.

Parents, just so you don't feel left out, we'd like to talk to you about our research and get your feedback on how you feel about what we do, especially when it comes to responsible research and innovation. Someone will be around whilst the workshops are happening if you'd like to talk to us.
