We are a team of researchers from the Fixing the Future project at the University of Edinburgh. We are excited to invite you to participate in our upcoming online workshop---“Right to Repair card deck evaluation”. This workshop aims to gather valuable insights and feedback on a card deck designed to support the longevity and ‘right to repair’ of consumer electronics and Internet of Things devices.

We are keen to hear from a wide range of participants working on these topics, so if this sounds of interest to you, please do sign up. We are particularly interested in hearing from those working across the supply chain of design, deployment and operations for consumer-focused Internet of Things and electronics devices and services. So, we especially encourage those who are design professionals or practitioners, UX specialists, students or researchers, product developers or managers, IT professionals, engineers, academics, legal practitioners, repairers etc.

Sign Up QR code:

The card deck we will be evaluating focuses on the legal aspects of how design can support the 'right to repair' in the design of IoTs, primarily based on European Union and UK legislation. These cards have been designed to provide valuable guidance and information for product development teams working on IoT devices. We will be hosting a 1-hour online workshop where there will be an introduction to the cards, some activities to work together on using the cards, and time for feedback and discussion with your group.

Please use the link or QR code provided to express your interest in attending by 15th of Jan 2024. The link will offer you particular time slots that best suit you, so please select those when signing up so we can allocate you to a group at a time that suits you. We will then send you a consent form and announce your time allocation of the workshop. We will be hosting the workshop on Microsoft Teams and will send an invite out to you to hold this in your diary.

If you have any questions or require further information, please do not hesitate to reach out to the following email address: s2184082@ed.ac.uk. To find out more about the wider project, see <https://ftf.wp.horizon.ac.uk>

Thank you for your interest and we look forward to your participation!
